## SUMMARY

I am a Web Developer with training in both Front End and Back End. My experiences with computer languages include: SQL, JavaScript/jQuery, JSON, HTML/HTML5, and CSS/CSS3 with a goal of learning C#. The databases I have worked with are MySQL and MongoDB along with Sequelize and Mongoose features. Application templates: React.

I have a background of customer service in the supermarket industry and in the non-profit Optimist Club. Coworkers would point my persistence and adaptability in situations as my notable strengths, and I have earned multiple commendations for quality customer service.

## TECHNICAL SKILLS

Languages: SQL, JavaScript, jQuery, JSON, HTML/CSS, HTML5

Applications: React

Database: MySQL (v.), MongoDB (v.), Access

## PROJECTS

**LIRI** | <https://www.github.io/ryanlester91/LIRI> : A language interpretation & recognition interface app that calls Spotify, OMDb, and Bands in Town databases for information about songs, movies, and music bands: *Node.js*, *dotenv*, and *moment.js*.

**Bamazon** | <https://www.github.io/ryanlester91/Bamazon> : Mock shopping and inventory app. Customer module for purchasing items, and Manager module for adding/removing items and restocking them: *Node.js*, *mySQL*, *inquirer*, and *Create/Read/Update/Delete functions*.

**Clicky Game** | <https://vast-lake-32909.herokuapp.com/> | <https://www.github.io/ryanlester91/clickyGameB/clicky-game2> : *React*-based memory click game with characters from *Tenchi Muyo!* anime. The app randomizes the cards each time you click a character.
