SUMMARY

I am a Web Developer with training in both Front End and Back End. My experiences with computer languages include: SQL, JavaScript/jQuery, JSON, HTML/HTML5, and CSS/CSS3 with a goal of learning Java and C#. The databases I have worked with are MySQL and MongoDB along with Sequelize and Mongoose features. Application templates: React.

I have a background of customer service in the supermarket industry and in the non-profit Optimist Club. Coworkers will point my persistence and adaptability in situations as my notable strengths, and clerking for Publix has earned me multiple commendations for quality customer service.

TECHNICAL SKILLS

Languages: SQL, JavaScript
Applications: React
Database: MySQL, MongoDB

PROJECTS

Psychic Game | https://ryanlester91.github.io/Psychic-Game/ : CSS-styled web page in which the user guesses a letter using keystrokes

LIRI | https://www.github.io/ryanlester91/LIRI : A language interpretation & recognition interface app that calls Spotify, OMDB, and Bands in Town databases for information about songs, movies, and music bands: *Node.js, dotenv, and momentjs*.

Bamazon | https://www.github.io/ryanlester91/Bamazon : Mock shopping and inventory app. Customer module for purchasing items, and Manager module for adding/removing items and restocking them: *Node.js, mySQL, inquirer, and Create/Read/Update/Delete functions*.

**Clicky Game | https://vast-lake-32909.herokuapp.com/ |
https://www.github.io/ryanlester91/clickyGameB/clicky-game2 :** *React*-based memory click game with characters from *Tenchi Muyo!* anime. The app randomizes the cards each time you click a character.

EXPERIENCE

Demo Day participation and three team projects during 6-month coding bootcamp class (see in Education below)

EDUCATION

Bootcamp Certificate in Web Development
University of Richmond and Trilogy Education – Richmond, VA

May to October 2019

6-month basic web and application development class plus webinars and career services geared toward employer readiness and competitiveness. Included a final Demo Day presentation of project for prospective employers
